

Tailored to meet your customers' needs

Agility Software provides integrating business solutions to meet the accounting, stock and credit controlling needs of the retail, wholesale and service sectors of your customers business.

The time-saving efficiency of the software is tailored to suit each client's requirements allowing business owners, finance departments and stock control to remain confident in the stock and sales development of their company.

Key benefits of Agility Software:

- 1) Agility's suite of products are all seamlessly integrated with the core financial application updating the nominal ledger in real time. This core application as well as a fully functional nominal ledger includes a fixed asset register, purchase and sales ledgers, purchase and sales ordering, stock control, works order processing and fixed asset ledger.
- 2) Agility EPOS is a sophisticated point of sale application for both cash and account sales, supporting multiple account discount structures, store promotions, voucher sales and receipt, loyalty card transactions, saving club management, integrated credit card processing as well as many other features. Sale items can be flagged for delivery or later collection by the customer.
- 3) Agility Touch is the latest in technology providing a touch screen point of sale with integrated credit card authorisation, loyalty card processing and gift cards. This application will also continue to function even if its link to the server fails, storing the sales on a local database and uploading as soon as the connection is restored.
- 4) Supporting the main Agility applications are a suite of mobile systems that provide in-store processing for price checking, goods receipt, shelf label printing, stock taking. In addition systems are available for on the road use, for signature capture on delivery and mobile printing of delivery notes.
