

Discover the benefits of mobile computing

Integral Mobile Data provides mobile computing software for business applications. It enables seamless and secure applications for data integration between mobile workers and any back-office systems to be created within days. Integral mForms® reduce risk and expenditure by offering bespoke quality implementations at “out-of-the-box” speed and “off-the-shelf” price.

Benefit for a reseller to partner with Integral Mobile Data?

The programme offers cross industry ISVs, VARs/SIs the ability to mobilise their customers - speedily, reliably and cost-effectively by the deployment of Integral mForms® configured by them to their customers' or market sectors' specific needs.

Key benefits of becoming a partner

- Create mobile solutions up to 30x faster than traditional development methods
- Improved customer responsiveness and improved margins
- Built-in integration of comprehensive capabilities
- Supports legacy and turnkey environments
- Extensive platform support – write once, deploy many
