

Agile wireless solutions for all aspects of business

Momote create fully bespoke mobile workforce management applications, for any and every mobile device, to meet the needs of each and every client. As Momote's solutions are bespoke they have clients across many verticals including high-street retail, automotive and logistics.

Benefits of using Momote's solutions:

Organisations can benefit from real-time information exchange in every part of the job process:

- Jobs sent directly to device from central office – no need for drivers to waste valuable time collecting job sheets and dropping them off again.
- Information collected onsite - including signature and payment details, and sent directly back to the office in real-time. Massively reducing the payment cycle with huge implications for cash flow.
- Central office has full visibility of workforce at all times – ensure the right people are doing the right jobs at the right time, leading to excellent customer service which in turn means considerable gains in repeat custom.

Important information:

Resellers can utilise Momote's mobile workforce management software expertise to create mobile applications to target new markets or to up-sell to existing clients. Resellers can either recommend Momote to existing clients with a mobile software need and receive a 'finders fee' or they can take on their own white labelled application to add to their existing product portfolio.

Key markets: Retail - Automotive - Logistics
